

TasWater community notice

TasWater advises residents of Colebrook that we will carting to supplement water supply to Colebrook from **Saturday, 28 April 2018**.

The Yarlington Dam water reserves have reduced to a level that requires us to cart water from Campania to ensure continuity of supply.

You will notice water trucks travelling on Yarlington Road to the Smarts Hill Reservoir and the Upper Yarlington Reservoirs during April and May until the new pipeline from Campania can be connected into the Colebrook reticulation system. This will be contingent on additional rain to replenish the water supply. The pipeline is scheduled to be completed by the end of May 2018.

If you would like more information about the water carting or the 24glasses – Regional Towns Water Supply, please call John J Murray, Community Engagement Officer, Regional Towns Water Supply Program on 13 6992 or email enquiries@taswater.com.au.
